

AP Biology Summer Assignment 2017-2018

AP Biology is a rigorous course and due to the large amount of material that needs to be covered during the year, a summer assignment is essential.

The first part of your summer assignment is to learn **Chapter 6, A Tour of the Cell, Concepts 6.1-6.7**. You will be given a test on this chapter the first week of classes. I have provided you with a power point for this chapter. The second part of your summer assignment is to read and outline the following: **Chapter 40, Animal Form and Function, Concepts 40.1 - 40.4, p.852-872**. This is due the first day of classes. It must be handwritten and stapled together. Below is a *sample outline format* for this assignment.

To complete this assignment the textbook is necessary. The textbook is **Campbell Biology, 9th Edition**. Many school districts might provide you with an older edition; however, this edition is necessary for the assignment and is designed to meet the requirements of the revised AP Biology curriculum.

I look forward to seeing you in September and if you have any questions, please feel free to contact me. My email address is tgrimaldi@stanthonyschools.org.

Sample Outline Format

I. Introduction

A. Overview

II. _____ (First subtopic)

A. _____ (First Point)

1. _____ (supporting evidence)

a. _____ (example)

2. _____ (supporting evidence)

B. _____ (Second Point)

1. _____ (supporting evidence)

a. _____ (example)

b. _____ (example)

2. _____ (supporting evidence)

3. _____ (supporting evidence)

a. _____ (example)

C. _____ (Third Point)

III. _____ (Second subtopic)

A. _____ (First Point)

1. _____ (supporting evidence)

2. _____ (supporting evidence)

a. _____ (example)

B. _____ (Second Point)

1. _____ (supporting evidence)

2. _____ (supporting evidence)

3. _____ (supporting evidence)

IV. _____ (Third subtopic)
